

Workshop Learning Resource 4

Creating a Personal Profile

Digital Image Processing, Social Networking, thinking about how to share

Overview:

Continuing to gain skills using GIMP, thinking about how to share what you like and what you are learning, an introduction to blogging. What else do you want to learn?

1. Continue using the introduction to GIMP (week3_resources_gimp.pdf) downloadable from the Week 3 Workshop page to learn image manipulation skills. This will take up most of the session.
2. Resizing images for the web
3. Uploading your images to the web (the ZDLT blog page).
4. Thinking about how to share what you like and what you are learning - do you have any comments for the blog? How about setting up a ZDLT Facebook Group?
5. What is a blog? How do I set one up?
For an easy way to start bogging try www.blogger.com
6. Next week we will be making stencils. Think about the kind of image that would be good for a stencil.
7. Over the next week think about other things you would like to do or learn to do in these workshops. Bring some suggestions next week.

Conclusion:

This week we have had an introduction to digital image manipulation and the basics of the GIMP- including, trimming, selecting, copying, pasting, layers, resizing, adding text, how to create composite images, and rendering the images to the file format needed.
