A mysterious and controversial technology is among us. The Blockchain underpins digital currencies and makes possible dramatic new conceptions of global governance and economy, that could permanently enrich or demote the role of humans – depending on who you talk to.

This exhibition presented by Furtherfield features artworks that envision future world-making by machines, markets and natural processes, free from interference by states and other human institutions.

Artists Jaya Klara Brekke, Pete Gomes, Rob Myers, Primavera De Filippi of O’Khaos, Terra0, Lina Theodorou and xfx (aka Ami Clarke) imagine a world in which responsibility for many aspects of life (reproduction, decision-making, organisation, nurture, stewardship) have been mechanised and automated. Deferred to the blockchain.

**NEW WORLD ORDER** artworks include a self-owning forest with ideas of expansion, a self-replicating android flower, a tale of lost innocence, a DIY money making rig, a Hippocratic Oath for software developers and a five minute marriage contract.

**EXHIBITED WORKS**

**Terra0** is an artwork and prototype for a self-owning, self-exploiting forest by Paul Seidler, Paul Kolling and Max Hampshire. Initiated by humans, over time the forest sells its raw materials, accumulates capital, buys itself and expands to new territories.
Plantoid is an autonomous blockchain based artwork. When the metal sculpture of a flowering plant receives a certain number of Bitcoins it commissions an artist to create a new artwork. Contributors set the rules surrounding the genetic traits (the dna) and the soul (the governance) of the new “child” Plantoid. Exhibition visitors will be able to buy Bitcoins to tip the sculpture and determine how Plantoid will evolve.

Bad Shibe is a sci-fi novella by Rob Myers illustrated by Lina Theodorou dealing with the implications of a new wave of fully financialised planetary-scale automation and the struggle to discern right from wrong when human and machine agency merges. It also invites us to think of humans and societies as much as the effects of technology.

untitled, data collection from domestic ether mining rig, by xfx (aka Ami Clarke) is a video as data capture, showing glimpses of the material parts of an ether mining rig. It conveys the energy used and the sweat equity of a DIY cryptocurrency prospector with finely tuned financial calculations and a (not so free) money mining system.

Handfastr - making commitments wherever you are uses blockchain to reconfigure social pledges. Taking marriage as an example of a social contract, Handfastr whittles it down to a temporary agreement on a smartphone. Created by Corina Angheloiu, Max Dovey and James Stewart at the Blockchain Body Storming Lab at Design Informatics, Edinburgh University.

The Blockchain - Change Everything Forever, a Furtherfield film directed by Pete Gomes was created to diversify the people involved in thinking about blockchain technologies by bringing together leading thinkers, computer scientists, entrepreneurs, artists and activists to answer some of the key questions: What can a blockchain do? Who builds this new reality? How will we rule ourselves? How will the future be different because of the Blockchain?
EVENTS, ACTIVITIES, WORKSHOPS & WEDDINGS

Manpowertop - free workshop by Network Diagnostics
Saturday 10 June, 2–5pm, Furtherfield Commons
Join Network Diagnostics (Dave Young and Niall Docherty) to discover how the promotional media of Silicon Valley companies envision the role of technology in society.

GeoCoin - Bodystorming Blockchain in the City
Friday 23 June 10-5pm, Furtherfield Commons, Finsbury Park
A day of design-based research using the GeoCoin platform to explore novel ways of reconsidering and reinventing currency through location-specific value transactions.

Book launch - Artists Re:thinking the Blockchain
RESCHEDULED - Date TBC
‘Artists Rethinking the Blockchain’ produced in collaboration with the experimental publishing group Torque and Liverpool University Press

Wedding event day - blockchain special
Saturday 24 June from 11am-5pm
Ever wanted to join your partner in bitcoin matrimony? Or wanted to join another partnership for a short time only?

Visit www.furtherfield.org programmes/exhibition/new-world-order for more information and booking details

FURTHERFIELD GALLERY

Furtherfield Gallery is located in the middle of Finsbury Park attracting large numbers of diverse visitors reflecting the Gallery’s unusual location. Jenny Judova of Fad magazine picked Furtherfield Gallery as one of the top five galleries in London that show new media art and ArtSlant featured Furtherfield Gallery in ‘The Best Non-Profit Art Spaces in London’.

McKenzie Pavilion, Finsbury Park
London N4 2NQ
T: +44 (0) 7737 002879

ABOUT FURTHERFIELD

Furtherfield provides diverse access points for the creation, authoring and appreciation of art forms that arise from networked and digital culture. Through exhibitions, labs and debates around today’s important questions, people explore the expressive and democratic potential of our artistic and technological cultures – locally, nationally & internationally.

www.furtherfield.org

ART DATA MONEY

NEW WORLD ORDER is part of an international programme of labs, debates and exhibitions with leading artists and writers testing alternative economies for arts in the network age. In October 2017 NEW WORLD ORDER will tour to Aksioma (Ljubljana, Slovenia) as part of State Machines: Art, Work, and Identity in an Age of Planetary-Scale Computation.
NEW WORLD ORDER is supported by Ravensbourne and the Goethe-Institut London.

This exhibition NEW WORLD ORDER is realized in the framework of State Machines, a joint project by Aksioma (SI), Drugo more (HR), Furtherfield (UK), Institute of Network Cultures (NL) and NeMe (CY).

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.
